### Product Description

## 4S Wildlife Solutions - Antler Addict Deer Mineral Bag

*Unlock your deer herds potential with Antler Addict Deer Mineral, the product that 4S was founded on.* Antler Addict Deer Mineral is a scientifically developed formulation of minerals and vitamins that provide your deer herd with the nutrients often deficient in nature. Incorporate an Antler Addict Mineral site on your property to promote overall herd health and provide the nutrients deer need to grow to their true potential (both body and antler size).

Antler Addict contains organic chelated minerals, a nutritional feed ingredient for animals combining organic zinc, manganese, copper and cobalt. These trace minerals support numerous functions in an animal's body including: immunity, reproduction, skin/hoof integrity, growth & muscle development, milk production, fiber digestion and energy metabolism. In addition, when an animal has the proper balance of trace minerals it is better able to cope with the challenging effects of stress. These are the most bioavailable trace minerals on the market, meaning more of the minerals are absorbed by the animal, delivering more benefit to the animal.

- **SUPPLIES & REPLENISHES:** Supplies & replenishes deer with the quality minerals and vitamins that are required for overall herd health and antler growth but are often deficient in nature
  - **HARD, HEAVY, HEALTHY BONE:** Nourishes bone strength, helping create healthier, harder antlers, reducing breakage
  - **KEEP THEM COMING BACK:** Strong aroma and highly attractive flavor draws whitetails in from a greater distance and helps keep them around
  - **LONG-LASTING:** Specifically designed to slowly disperse into the soil prolonging the life of the mineral
  - **Also available as:** 25lb Deer Mineral Block
  - **Pro-Tip:** Top Antler Addict Mineral off with some CORN SPIKE to jump-start your mineral site
-
