### Product Description

## 4S Wildlife Solutions - Harvest Advantage

**1 BAG PLANTS ? ACRE [BROADCAST] OR ½ ACRE [DRILLED] (50lbs)**

Whether your goal is to provide nutrition for your herd or you just want to see more deer, this mix will fit the bill. Harvest Advantage is a premium Fall/Winter food plot blend combining a mixture of small grains that can produce up to 3 tons of forage per acre, and are well adapted to the south. With proper fertility and management, these grains will provide quality forage with crude protein in the range of 15-25%. Planted in early fall, this mixture will provide late fall grazing and continue to produce until April or May.

- **HIGH ATTRACTION & NUTRITION:** Mixture of small grains that can produce up to 3 tons of forage per acre
  - **WELL ADAPTED TO THE SOUTH:** Quality grains that perform well in the Southern heat
  - **PALATABLE HIGH PROTEIN FORAGE:** With proper fertility and management, these grains will provide quality forage with crude protein in the range of 15-25%
  - **CARRY-OVER IN THE SPRING:** Grain will mature in the Spring providing an added benefit to the wild turkey and other game birds on your property.
  - **PRO-TIP:** Plant with 4S Planter Forager Plus to provide an array of quality food sources in one location
-
