Product Description

eXmark 52" Radius X-Series Zero Turn Mower

If you're looking for the power and productivity of a premium commercial mower on a budget, you're looking for a Radius X-Series. It combines features proven on our premier machines with the unbeatable value and efficiency you've come to expect from the Radius.

Choose from 52- or 60-inch UltraCut Series 4 cutting decks, both with powerful Kawasaki commercial engines — an FX801 on the 52-inch, and an FX921 on the 60-inch. The integrated Hydro-Gear transmissions work with aggressive 24-inch Kenda drive tires to provide unmatched traction and control, with forward speeds of up to 10 mph. Large semi-pneumatic caster tires, cast steel caster forks, and tapered caster pivot bearings provide years of maintenance-free performance. With an adjustable full-suspension operator seat and isolated floor pan, the Radius X-Series makes “mow time” more enjoyable.
