Product Description

eXmark Commercial 21 V-Series Electric Walk Behind

With the same 5-inch-deep die-cast aluminum cutting deck as our gas-powered Commercial 21, the new Commercial 21 V-Series is the only electric walk-behind that cuts like an Exmark. And with the same heavy-duty transmission, 2-bail control system, and zone-start blade engagement, it's the only electric lawn mower that feels and lasts like an Exmark. With its 60V rechargeable power system, there's no gas, no oil, and virtually no maintenance needed. If you're looking for the premier commercial electric walk-behind mower, you've found it in the Commercial 21 V-Series.

Perfect for landscaping assignments in areas with sound ordinances or zero-engine exhaust emission mandates, the Commercial 21 V-Series electric walk-behind mower is the perfect way to comply and crush any job in front of you.
