Product Description

eXmark 42" Quest V-Series Electric Zero Turn Mower

The new Quest V-Series takes electric residential zero-turn mowers to the next level, with the commercial features and performance you expect from Exmark. The electric drivetrain and 42-inch Electric Series 2 cutting deck provide instant torque while eliminating all belt-related maintenance. The Quest V-Series provides 60 minutes of runtime on four 10-Amp Flex-Force batteries, with the ability to add up to two more batteries for extended runtime.

The low center of gravity design, large drive and caster tires and comfortable operator seat keep you comfortably in control, with increased legroom for the operator. A standard deck step eases the mounting and dismounting of the Quest V-Series. Maintenance is minimized with the electric powertrain, integrated hydro transmissions, and just two annual grease points.

If you're looking for an electric zero-turn mower with the durability and cut quality of an Exmark, you've found it in the new Quest V-Series.
